- Office Support

SEARCHING FOR A NEW JOB AND/OR CAREER? THE CONSTRUCTION AND BUILDING SECTOR IS BOOMING!

The Hialeah Housing Authority is partnering with workforce training agencies and local employers to launch the Building Futures Initiative (BFI), a program to connect HHA residents to job opportunities in the construction, maintenance, and green building sectors. Opportunities for HHA residents include:

Contact HHA's FSS Coordinators

Ana Arce, Public Housing
(786) 257-3483

Barbara Ferreiro, HCVP
(786) 257-3466

- Connections to local contractors/employers
- Connections to construction/maintenance training programs, including Miami-Dade County Public Schools adult workforce programs
- Connections to career development support and networking opportunities
- HHA job opportunities for eligible residents in maintenance, vacancy team, admin, and others!

Women in Construction

Taking the leap into the building and construction fields can be daunting for anyone but may be especially so for women, in part because it is traditionally seen as a male dominated industry. Just because these jobs are typically filled by males does not mean that only men are capable of working in trades!

As construction industry jobs are expected to increase in 2022 and a large portion of the current construction workforce is expected to retire in the coming years, more companies are looking to recruit women into the field.

Learning skills trades not only pays off in the job market but can benefit your personal life as well. Additional skills and education can translate into improvements in your life and increase self-esteem.

While there are jobs within this industry that involve physical work, there are also several that do not. Just like in any business there is a need for individuals to help with administrative and organizational roles, and more.
